

Hello, I'm Lena

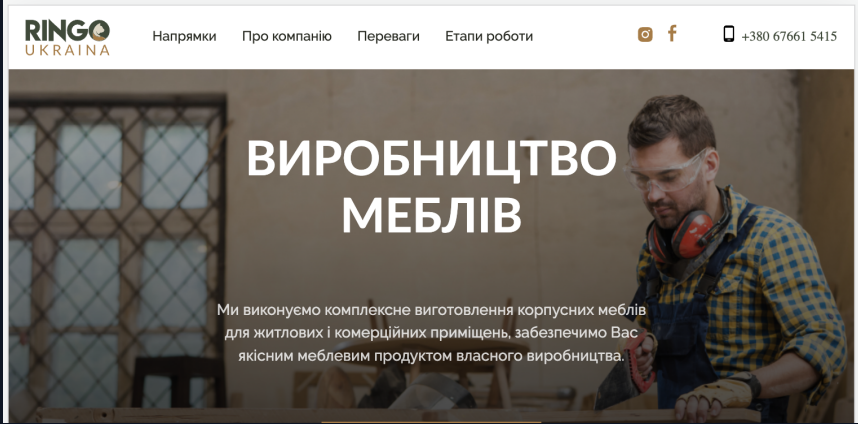

Trainee Front-end/HTML coder

I seek an opportunity to grow professionally as a programmer. I am persistent and hardworking, focused on results. I really like to see the result of my work and I want to get into a team of like-minded people, create cool applications together, develop, and finally obtain commercial experience.

- Graphic Tools: Figma, Photoshop.
- Version Control System: Git, GitHub.
- Build Tools: Gulp (basic proficiency).
- Methodology: BEM.
- English Language: A2+ level.

About Me

Even though I haven't worked as a Front-End developer in a professional setting, I genuinely believe that with determination and hard work, we can achieve just about anything. During my four years as an IT recruiter, I had the chance to work with clients from the US, Middle East, and Europe. This experience really got me excited about the IT field and motivated me to switch to a career as a Front-End developer. I finished the Junior Front-End Developer courses with flying colors at Main Academy from March 2021 to October 2021. The program covered HTML/CSS, JavaScript, jQuery, Bootstrap, and Photoshop in a comprehensive 140-hour curriculum. After the courses, I kept on learning about Front-End development independently, going beyond what I learned in the program. I put this knowledge into action in real projects and achieved some solid results. I'm committed to always improving my skills and learning more in this field. I'd be really grateful for a chance to take a test task to show what I can do. I'm on the lookout for a Trainee/Junior position where I can put my current skills to work and am totally open to learning whatever is needed for the job.

Education and Certificates

Responsive Web Design (freeCodeCamp - 2023)  
Skills: CSS · CSS Grid Layout · CSS Flexbox · HTML5

Junior Front-End Developer Certification (Main Academy - March 2021 - October 2021)
