

Hello, I'm Lena

I'm a Frontend Developer with 1 year of experience in developing web applications from scratch and maintaining existing solutions. I'm currently seeking new opportunities to grow professionally, contribute to impactful projects, and collaborate with a team of skilled, result-driven developers. I'm eager to bring value to your business and look forward to discussing how I can help.

Work Experience

Junior Frontend Developer
Rocking Tech: December 1, 2023 - now
Full-Time: 6 months
Project-Based: 6 months

During my commercial experience, I contributed to 6 projects, primarily focusing on front-end development with Vue 3, Sass, and JavaScript, using tools like Vite. I also gained hands-on experience with back-end technologies, including PHP (for form validation), Laravel (Blade templates, routing, database operations, and Axios), Docker, and MySQL.

- Debugged and resolved issues in Vue 3 and Laravel projects, optimizing functionality and style consistency.
- Improved codebase maintainability and efficiency through systematic refactoring
- Transformed client-provided designs into adaptive HTML/CSS layouts, ensuring cross-device compatibility
- Leveraged BEM methodology for clean and scalable CSS architecture
- Built reusable Vue components with the Composition API and implemented Vue Router for SPA navigation
- Integrated Axios for API communication, managing HTTP requests efficiently
- Developed features like sliders, filters, and form validation on both frontend and backend
- Successfully migrated legacy projects from WordPress to modern frameworks

Technical Skills:

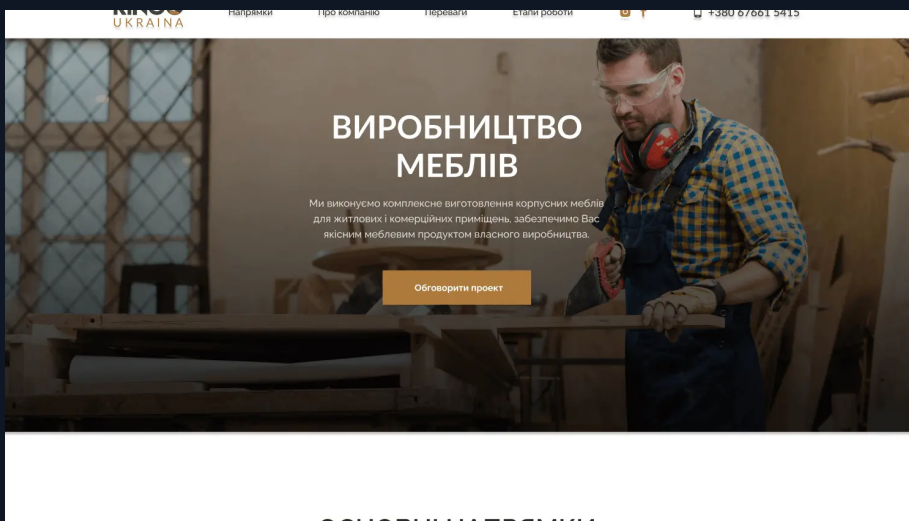

- Frontend: HTML5, CSS3 (including SCSS), Tailwind CSS и Bootstrap JavaScript, Vue.js
- Backend: Laravel
- Build Tools: Vite, Gulp
- Version Control System: Git, GitHub
- Containerization: Docker
- API Integration: Experience with 3rd party services and APIs; proficient in using Axios for efficient HTTP requests and handling REST APIs.
- Graphic Tools: Figma
- English Language: B1 level

Training Projects

Responsive Relocation Website
Technologies Used: Vue.js (Vue 3), Laravel, Vite, Vue Router, MySQL for data storage, integration with 3rd party services and APIs

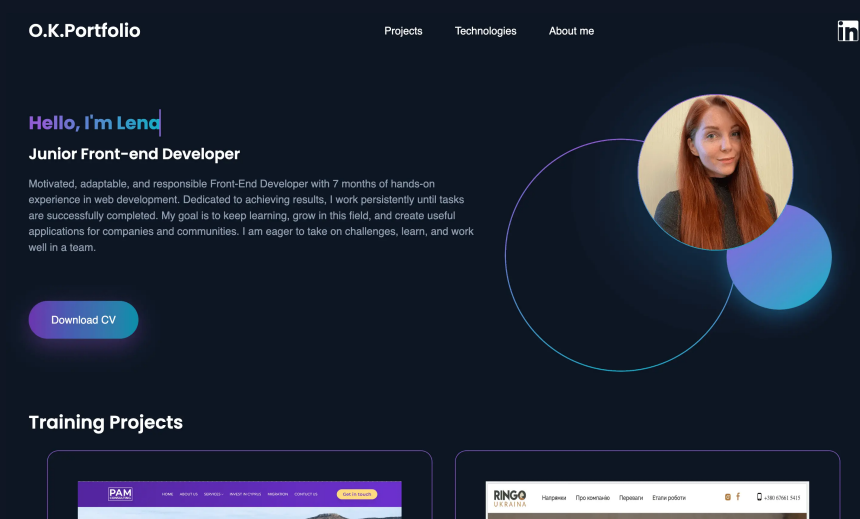

GitHub
